

NCLEX Inspirations

Garrison's NCLEX Review

Letter From The Editor

Anneliese Garrison, RN BSN CLNC

May Edition
Volume 1, Issue 6

In this issue, I will discuss how to go about getting free resources for your studies be it HESI, ATI or the NCLEX legally or illegally. If you go about getting the information you desire by attending a free class please keep in mind this is the Presenters way of show-casing what they are capable of teaching you and hope you give a donation or buy a product. If you go about obtaining the product without a promotion or an invitation, then you

are stealing and this is known as the "Dark Web".

What exactly is the Dark Web?

That part of the World Wide Web that is only accessible by means of special software, allowing users and website operators to remain anonymous or untraceable.

The Dark Web poses new and formidable challenges for law enforcement agencies around the world.

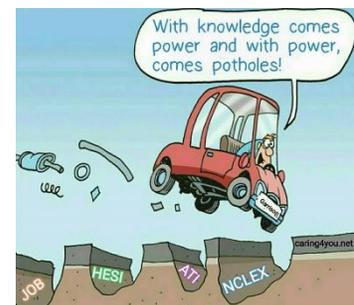

Obtaining free information secretly

is morally unethical and not a good quality for a future nurse to have. It is not what your parents taught you and it is not what your religious or spiritual beliefs have taught you.

If you engage in such behavior and fail your NCLEX, HESI, ATI or Nursing exam, well my friend, what did you expect?

Inside this issue:

Correct Review	2
Information Legally	2

Q: Where Can I find FREE stuff?

A: The internet is really turning into a "Dark Web" in this case. The best place to find free stuff is by joining any "Pass NCLEX, HESI or ATI" group on Facebook.

These kinds of groups go crazy posting copyrighted material. From Kaplan to the entire Qbank of UWorld, it is all there. Unfortunately, including my NCLEX material too. Keep in mind this is a

felony and you are infringing on copyright laws if you upload or download such material intentionally or unintentionally. "You gave it away free" or "I did not know", will not help you in the end. Be careful if you decide to take this route.

How To Find The Correct Review

There are so many Review and Tutoring Services on the internet these days that it is totally confusing you, the end user. One cannot really go by credentials. For example, Kaplan teachers may or may not actually be a nurse. All they need is a Bachelor's Degree in anything and a six week training course and this qualifies them to teach you the Review that you spent hundreds of dollars on. Another example may be a retired doctor who may charge

\$75 - \$100 / hr for tutoring services simply because of their credentials. This does not mean they can tutor the NCLEX, HESI or ATI. What should you look for when searching for help with your studies? The number one factor is stability. How long have they been putting forth a Review? How long have they been tutoring? I have been helping nursing students since 1997. I graduated in the class of '89 and the again in '96. I know

almost all the legitimate reviews and tutoring services specific to the NCLEX, ATI or HESI on the World Wide Web big and small. My advice to you would be that they know what they are doing if -
- they have been at their passion seven years or more this is a good sign. The most important way to find a good review is to follow your heart. The heart always knows best.

How Do I Obtain Free Information Legally?

You can use a third party peer to peer file share program like LimeWire that is a downloadable program on your desktop. Once installed, do a search for NCLEX and see what comes up. I also know you can get all 1900 questions of UWorld at www.4shared.com exactly where -- I do not know but it is all over any of the Facebook groups. If you

download the file, it will come up as a 3,238 page PDF. Now, that is a lot of pages.

Right now, the biggest trend

“Piracy: The unauthorized use of another’s production invention or conception especially in infringement of a copyright”

That seems to be happening these days is people setting up fake online drive accounts and fake emails. You can find Lippincott's NCLEX Review RN this way (438 page PDF) and you can find Mark Klimek material, Kaplan material NCLEX Mastery Remar material this way. Just about everything and anything.

Remember it is AL legal until it isn't. – tread carefully.

It Doesn't Hurt To Ask

I personally have a ton of free resources on the internet. I know that every legit Review or Tutoring Service will offer a trial period, free samples, something to get you in their doors. The internet is so full of piracy that it is literally confusing to you – the consumer. Let's be real, I know for a fact you can find Kaplan, Hurst, ATI, HESI, NCLEX

Mastery, Mark Kimek, Remar, Uworld and an assortment of the top selling books online – pirated. But no legitimate

“Social media mentality is changing. People expect everything for free and piracy is running ramped. If you truly can't afford it, ask. It doesn't hurt to ask.”

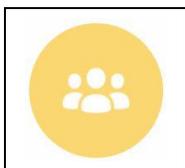

Review will give anyone permission to put their stuff online. They just wouldn't so ask. Just come right out and ask if you can have a discount or some kind of help.

They may not do it because the piracy is costing them money and time but hey, it doesn't hurt to ask.

Groups To Join

All legitimate Reviews will be on all these main social media sites: Facebook, Twitter, Instagram, Youtube, etc. All you have to do is go to their main website and you will see it.

If you are looking for free stuff, this stuff usually gets passed around the internet email to email. Look at the suffix of the email – is it Gmail? The original

sender may be on “Goggle Hangouts” so see if there is a secretive group. Is the suffix of the email yahoo? The original sender may have a yahoo group. While these groups are more secretive, they are still easy to find just go to Gmail.com or Yahoo.com and do a search. You will find what you are looking for but as I mentioned Facebook groups

are far and away the biggest and best to join. If you don’t find them, they will find you. If you are on Facebook, make sure you download Messenger. Messenger is used by Facebook and what people don’t want to post on a Facebook page they will send the link to you on Messenger.

Don’t Worry

Yes, we all know Russia meddled -- and still continues to meddle in our Political Affairs but no one has proof. Truth be told, no one has the resources or the crack cyber security they need to do anything about it. Everyone that sells anything on the internet knows they are being pirated yet, powerless to really do anything about it.

The only thing we can do is charge top dollar for what we teach. The only people you are hurting by uploading and downloading free information is

“If our government cannot catch Russia, How the heck is anyone going to catch you?”

the next student that comes after you. There is so much free information on the internet it is mind-blowing and it is the reason right now, you are reading this newsletter. You don’t know where to turn.

Do the right thing to begin with – buy or donate to the study material that helped you.

Don’t Snitch

I confronted a man who was taking pictures of my material and sharing them with his friend. Shortly thereafter, they both wrote negative reviews about me bringing my 5 star rating down to a 4.5. Remember, you can please some of the people some of the time but

you can never please all the people, all of the time.

If and when, someone approaches you about copyright infringement, do the right thing and dump it from your computer or phone or any other place you may have put it and stop doing your behavior but don’t snitch. It is up to the World Wide Web to figure all this piracy out. You

have stolen before this is why you think you may be getting stolen from.

If you contact me, no more refunds as a policy. I have you figured out. I don’t have the money to prosecute you. However, the colleges and the big companies do and they will.

Fax: 856.455.4689

Healing your community one nursing student at a time!

I have been helping nursing students pass their NCLEX since 1997 and it has been such a blessing for me to do so. After 20 years of helping with the NCLEX, I would like to write a book and place not only my knowledge in this book but I would like to place your inspirational stories throughout the book as well. So please submit your story about your journey to become a nurse. I would be honored to publish it in this newsletter.

If you know anyone that needs a tutor for the NCLEX that truly cares about their career and them as a person, please feel free to call me or contact me via the web and let me see what I can do. This year is your year for success

We're on the Web!
www.caring4you.net

FREE Notice!

To the big corporations helping with the NCLEX: Please do not contact me about your material. Either we have to ban together as a group and figure out some kind of cyber security agency or we have to adjust. I know my stuff has been hacked and is on the web free. Search all you want -- all of me and what I am about is out there for the World Wide Web to see.

To the independent individuals helping with the NCLEX: If you were mentioned in this newsletter, your material is on the internet and more. Please stop hacking my social media with your followers

advertising your material unless I request you to do so. I cannot tell you how many "ghost accounts" I have had to delete from my closed group.

To the free NCLEX material uploader: I know you mean well and want to help others but all you are doing is breaking intellectual property laws. All the people you feel you are helping, will not be there for you at your trial or help you pay your fines -- you had to pay for it let your brother or sister in white pay for it. Help in other ways but sharing copyrighted information is not the way to go about helping others.

To the free NCLEX downloader: STOP -- JUST STOP. This is not morally correct nor is it religiously or spiritually correct. Please delete all of your electronic devices of this material. Even if you do this, all electronic devices leave a fingerprint unless you do a factory install. Stop -- drop -- and roll (Do a factory reset). You are hurting those around you. A fire only spreads.
